

# GENERAL OVERVIEW

## Who we are

Matrix Toll Manufacturing, based in Midland, Texas, provides high-performance chemical solutions that enhance operational efficiency and sustainability in oilfield operations.

## Core values

Innovation, quality, and environmental responsibility define our approach to chemical manufacturing, ensuring we deliver best in class solutions for the oil and gas sector.

## Our expertise

Our expertise includes friction reducers, scale inhibitors, biocides, and on-site blending, designed to improve operational performance and sustainability.

Delivering efficiency, sustainability,  
and high performance in  
oilfield operations.

# Problems addressed by Matrix Toll:

## Operational Inefficiencies

Inefficient fluid flow, equipment corrosion, and bacterial contamination contribute to costly downtime and reduced performance in oilfield operations.

## Environmental Impact

Traditional chemical solutions often result in high carbon emissions and environmental degradation, leading to increased regulatory pressure.

## High Operational Costs

The oil and gas industry faces escalating costs from frequent equipment maintenance, chemical use, and logistics inefficiencies.

Matrix Toll addresses key industry challenges by improving operational efficiency, reducing environmental impact, and lowering high operational costs in the oil and gas sector.

# EMPOWERING OPERATIONS WITH ADVANCED CHEMICAL SOLUTIONS

## Friction reducers

Enhance fluid flow for more efficient hydraulic fracturing.

## Scale inhibitors

Prevent harmful scale build-up to ensure system efficiency and reduce downtime.

## Biocides

Eliminate bacteria and maintain water purity, protecting equipment.

## On-site blending

Efficient, in-basin chemical blending for consistent supply and minimized downtime.

MATRIX  
TOLL MANUFACTURING LLC

Specialty formulated by  
Matrix Toll to deliver best-in-class  
performance and economics.

# Friction Reducers:

## MATRIX A SERIES

<b>MTM A20™</b>	High Brine Anionic Friction Reducer
<b>MTM A19™</b>	Mid Brine Anionic Friction Reducer
<b>MTM A15™</b>	Freshwater Anionic Friction Reducer

## MATRIX C SERIES

<b>MTM C50™</b>	High Brine Cationic Friction Reducer
<b>MTM C40™</b>	Mid Brine Cationic Friction Reducer
<b>MTM C30™</b>	Fresh to Low Brine Cationic FR

## KEY FEATURES

- Ultra-Fast Hydration
- High Brine Tolerance
- Slickwater and HVFR Capabilities
- Broad-Spectrum Application
- Environmentally Friendly Formula
- Customizable Performance

\*Matrix Toll Friction Reducers offer immediate activation, ensuring faster and more efficient hydraulic fracturing with superior fluid movement through enhanced slickwater and HVFR capabilities, even in high-salinity environments. Their broad-spectrum application makes them suitable for a wide range of brine conditions, from freshwater to high TDS. The non-VOC, environmentally friendly formula ensures sustainability without sacrificing performance. Additionally, each product is tailored to specific well conditions, delivering best-in-class efficiency and reduced operational costs.

# Matrix Toll Patented FR'S:

## DRY ON THE FLY | FRICTION REDUCER™

-  Ultra-fast hydration
-  Direct inject dry FR
-  Lower carbon footprint
-  No VOC
-  Freshwater to extreme brine range
-  Superior performance
-  Lower cost
-  Significant cost savings (\$1.0M/year per crews)
-  Fully self-contained

## ENVIROFR 2.25 | FRICTION REDUCER™

-  Lower FR consumption
-  Rapid hydration
-  Reduced horsepower demand
-  Higher rate potential
-  Lower treatment cost
-  Low VOC formulation
-  Cleaner operational profile
-  Consistent job performance
-  Field-ready application
-  Environmentally responsible

# Matrix Toll Patented Scale Inhibitors:

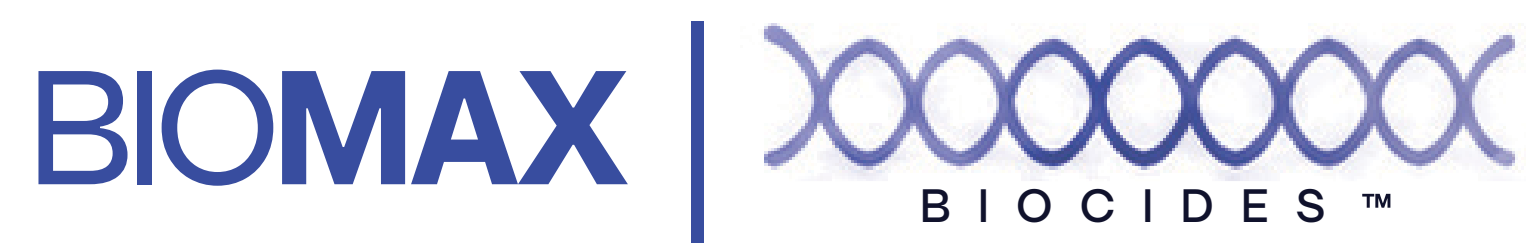

-  Lower FR consumption **by 20%**
-  Increases FR performance
-  Less degradation to FR over time
-  Advances beyond conventional inhibitor performance
-  Less colloidal damage to the shale formation

-  Superior performance
-  Lower vocs for the entire chemical package
-  Decrease your total cost to treat 1000 gallons by 10% to 30%
-  Reduce horsepower consumption
-  Environmentally friendly

- ScaleFrac 880 ensuring equipment longevity, Prevents formation of oilfield scales like calcium carbonate and barium sulfate. Enhances system efficiency and protects critical equipment.

# Matrix Toll Biocide Manufacturing:

Broad-spectrum bacterial control

Effective in high-TDS water conditions

Non-oxidizing formula

Low dosage, high efficiency

Environmentally friendly composition

Long-lasting protection against biofilm formation

Compatible with multiple fluid systems

Safe handling and storage

Safeguarding water and equipment

Improves well performance

- Biomax Neutralizes harmful microorganisms in fracturing fluids. Protects equipment from bacterial corrosion and enhances overall well performance.

# Matrix Toll delivers complete, ready-to-deploy solutions, tailored to streamline your operations with precision and care.

## LOGISTICS AND SUPPLY MANAGEMENT

Matrix Toll ensures efficient product delivery through optimized routes that reduce transportation costs while maintaining reliable, timely service. Our in-basin blending provides a consistent supply of chemicals, minimizing operational downtime and ensuring rapid availability to meet your needs.

## ON-SITE SERVICE AND SUPPORT

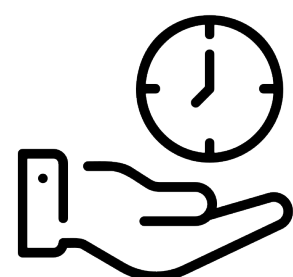

Our full-service teams manage pump trailers and crews on-site, ensuring seamless operations from setup to execution. With technical expertise, we offer hands-on assistance throughout the process, from product integration to performance monitoring, guaranteeing top-tier results.

## CUSTOM EQUIPMENT SOLUTIONS

Matrix Toll provides state-of-the-art field equipment, ensuring smooth operations with no delays. Our last-mile logistics deliver products and equipment directly to your well pad, ensuring zero downtime and maximum operational efficiency.

# Why choose Matrix Toll?

In-basin blending ensures consistent supply chain and reduces operational downtime.

**\$1.0m** /YEAR PER CREW

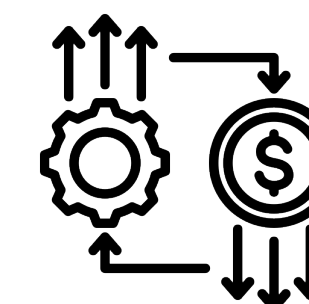

Achieve substantial cost savings through Matrix Toll's advanced friction reducers.

Best-in-class chemical solutions to meet specific client needs.

**30%**

Achieve substantial cost savings through Matrix Toll's innovative friction reducer technology.

Proven track record of improving operational efficiency and reducing costs.

**20%**

Minimize equipment wear and downtime with Matrix Toll's advanced scale inhibitors and biocides.

# Matrix Toll prioritizes eco-friendly solutions across all operations.

Minimizing environmental impact while maintaining high performance is at the core of our approach. Through innovative chemical solutions, we help reduce carbon emissions, support water conservation in manufacturing processes, and remain committed to lowering waste and pollution. Our efforts align with global environmental standards and include active participation in community and environmental initiatives.

# Our robust logistics network ensures timely delivery of chemicals to your well site.

From route planning to field coordination, our logistics team keeps chemical deliveries aligned with the pace of the job. We manage transportation, timing, and inventory around field needs, helping reduce downtime while making sure the right products are available when they are needed.

# Delivering hands-on support across every stage of your oilfield operations.

Matrix Toll Manufacturing provides technical consultations, on-site evaluations, and product performance monitoring. Our team of experienced professionals offers hands-on support to ensure seamless product integration into your operations.

# Driving innovation in chemical solutions

At Matrix Toll, our focus on research and development keeps new chemistry moving from concept to field-ready solution.

Our lab and testing capabilities help us develop, refine, and validate solutions built for the demands of oil and gas.

Working directly with clients, we tailor formulations to improve performance, support efficiency, and reduce environmental impact.

# Let's work together

We offer flexible partnership opportunities for companies seeking advanced chemical solutions and ongoing support.

We are committed to fostering long-term relationships with clients, delivering value through our products and services.
